

Health Safety & Environmental POLICY

The objective of Setcore Safety Management System is to prevent incidents and eliminate injuries, illnesses and environment damage. Careful Planning and alertness are required to achieve this goal.

The elements of the Company HS&E policy are:

- The Safety of employees, equipment, and the public is a core value of the Company and on the top of all operations.
- Safety will take precedence over expediency or shortcuts.
- Every attempt will be made to reduce the possibilities of injuries and illnesses.
- Employees will report all job related incidents , injuries and illnesses.
- All Setcore facilities will be audited in accordance with Setcore safety management system.
- All employees have the responsibility to become familiar with and conform to established safety rules, regulations and practices so as to create a safe and healthy working environment.
- Setcore will embrace a proactive approach to health , safety and environmental incidents through prevention of releases , spills and leaks, the pre- planning of job tasks and by maintaining effective contingency plans where critical.

All employees must become familiar with and support these facts
