

Quality policy

CERTIFIED
ISO
9001:2008

Quality control:
We focus our
expertise on very
specific services to
ensure high quality
and consistency

Setcore

Inspect. Evaluate. Innovate.

Setcore recognises that in order to meet and exceed our customers' expectations we must maintain the highest international quality standards in everything we do.

To ensure that this quality is achieved, we focus only on those disciplines and markets in which we provide world-class inspection and wireline logging services.

In offering these services, we fully implement the quality management systems and requirements of **ISO 9001:2008** and ensure that we meet all government, industry and safety regulations in the markets in which we work.

Every member of the Setcore team plays a part in delivering this quality promise. So we invest heavily in training to further build our team's expertise and to maintain close working relationships with industry training and regulation bodies.

We use the best available tools and equipment from selected approved suppliers, constantly assessing and upgrading these technologies based on international best practice.

The safety of our employees, our equipment and the public is paramount. Our clients trust us to perform on time; to deliver services that prevent incidents and eliminate injuries, illnesses and environmental damage; and to provide a safe and fulfilling working environment for all of our team and those around us.

Setcore is absolutely committed to investing the resources needed to continually improve the quality we deliver to our customers through the regular review of processes, policies, objectives and customer satisfaction.

The Setcore management team has committed itself to this policy and to its communication throughout the organisation.
